#4731 EXCITER II JET KIT 0-3000 Feet Elevation

Pilot Jets: 40
Main Jets: LH 320 RH 330
Needles: 6DH4
Needle Jets: 247-Q6
Needle Clip Position: #3
Air Screw: 3/4 turn out (depends on weather)

You must replace the pilot jets, main jets, needles, and needle jets. Notice the left main jet is 320 and the right is to be 330. These carb specifications are for sea level to 3000 feet elevation. For Hi-elevation use recommended Hi-elevation jetting kit. The air screw adjustment may be changed depending on weather. Note: If you have installed one of our oil injection conversion kits you may lean down the main jets two sizes.

3-6000 ft elevation use kit #4732
6000-10000 ft elevation use kit #4733

IMPORTANT

Always check jetting parts against the specs to be sure you have received the right parts. It is your responsibility to check this before installing the parts into your carbs. Jets are easily mixed up, we make errors too, so be sure to check all parts before installation.

CAUTION: To avoid engine damage absolutely no internal engine or carb modifications are encouraged other than what is recommended by Reichard's Performance Center.
